NESS & NESS+ ULTRA WRAP-AROUND FOR PANORAMIC VISION

These new models have been designed to offer you an unequalled field of vision thanks to its deep and very enveloping lenses. They will provide you with the security you need.

- Because our products are designed to adapt to your different businesses, their thin temples are discreet and can easily be slipped under a head or hearing protection.
- Ness+ offers you additional comfort with its co-injected temples and more performance thanks to its PLATINUM® lenses (double sided anti-scratch and anti-fog - K&N permanent coating).

Because our vision has no limits, the Ness+ can be customized with your brand colours.

Start your co-branding project with our online module or send your request to marketing@bolle-safety.com.
